

ENVIRONMENTAL POLICY STATEMENT

Global Advanced Metals understands that its operations have environmental impacts and that it has obligations to the community and future generations. The Company also recognises that environmental performance relies upon education to improve the awareness and responsibility of all employees and contractors.

As a minimum, the Company's operations are to be conducted in compliance with all applicable legal and other requirements. Further, the Company commits to continually improving environmental performance and protecting the environment by:

- Integrating environmental, social and economic considerations into project planning, exploration, operations, rehabilitation and decommissioning;
- Implementing environmental controls and strategies to identify, minimise and, wherever possible, avoid environmental harm arising from operations – in order to protect the environment;
- Monitoring relevant environmental parameters;
- Auditing and reporting environmental performance;
- Minimising pollution by effectively controlling emissions and the generation of waste and disposing of wastes in an environmentally responsible manner;
- Communicating openly with stakeholders and the community about environmental issues and expectations;
- Providing training and resources for effective environmental management.

Global Advanced Metals is a pro-active environmental manager which consults with Government and the Community to ensure that it is a responsible corporate citizen.

We acknowledge that it is the responsibility of all personnel to be committed to ensuring the effective management and implementation of this system and to encourage its continued improvement.

Max McGarvie
Executive General Manager – Resources
